## Item 7.01 Regulation FD Disclosure

**Stockholm, Sweden. October 24, 2018** – In an inauguration ceremony presided over by the King and Queen of Sweden, the country's Nationalmuseum reopened after a five-year \$132 million renovation. ArtRatio ([www.artratio.co.uk](http://www.artratio.co.uk)), in collaboration with VariGuard SmartGlass (a business unit of Research Frontiers Inc.: Nasdaq: REFR), was selected as part of this initiative to protect priceless books and objects from damage as a result of exposure to light.

The Nationalmuseum selected ArtRatio's display case, engineered using VariGuard SmartGlass, to allow visitors to experience these objects while at the same time providing unprecedented protection against irreversible damage from exposure to light.

Some of the works being protected by the ArtRatio display case include:

- Book of Hours, St. Christopher carrying the Christ Child, watercolour and gold on parchment, Spain, c1400.
- Book of Hours, Arrest of Christ, watercolour and gold on parchment, France, c1500.
- Ivory object, Christ on the Cross, France, c1350.
- Book of Hours, St. Catherine and Kneeling Donor, watercolour and gold on parchment, Netherlands, c1430.
- Book, The Hours of Giraldu-Guicciardini: The Rising of Lazarus; Death Carrying a Scythe; 1500-1525, Watercolour, gold on parchment, Italy.

Many objects in the collection date from the Middle Ages and are highly susceptible to permanent damage from exposure to UV, visible and infrared light. To exhibit the selected items, the Nationalmuseum collaborated with ArtRatio to design a display case which uses VariGuard's SmartGlass instead of traditional conservation glass.

### **Nationalmuseum Comments**

**“The ArtRatio smart glass table works wonderfully, does its job of protecting our manuscripts and looks great in the room as well!”**

*Carina Pia Fryklund – Curator, Department of Prints and Drawings, Nationalmuseum*

**“With VariGuard SmartGlass we can now show very light sensitive illuminations in a gallery where we also let daylight coming in.”**

*Joakim Werning – Exhibition Designer, Nationalmuseum*

### **VariGuard SmartGlass vs Traditional Conservation Glass**

The exhibition of these highly-sensitive works would not have been possible, or the exhibition duration would have been severely limited, were they not protected by ArtRatio's display case using VariGuard SmartGlass. Traditional conservation glass protects against UV, but not against damage due to visible or infrared light. This does not provide optimal protection since UV accounts for less than half of the fading (often only one tenth). VariGuard's SmartGlass not only protects against UV, it also protects against damage from visible and infrared light by silently, instantly and automatically switching from clear to over 99% light-blocking (whenever the books and objects are not being viewed) to provide maximum protection against fading and structural breakdown.

### **About The Nationalmuseum of Sweden**

The Nationalmuseum in Stockholm is Sweden's largest museum of art and design, and its collections comprise more than 700,000 objects, paintings, sculpture, and drawings. Following the renovation, the museum offers larger display spaces across three floors that will showcase 5,200 objects (compared with about 1,700 before the renovation).

Details are noted in the press release attached as Exhibit 99.1 to this Current Report on Form 8-K and incorporated herein by reference. The Research Frontiers press release is also available on the Company's website at [www.SmartGlass.com](http://www.SmartGlass.com) and at various other places on the internet.

This report and the press releases referred to herein may include statements that may constitute "forward-looking" statements as referenced in the Private Securities Litigation Reform Act of 1995. Those statements usually contain words such as "believe", "estimate", "project", "intend", "expect", or similar expressions. Any forward-looking statements are made by the Company in good faith, pursuant to the safe-harbor provisions of the Act. These forward-looking statements reflect management's current views and projections regarding economic conditions, industry environments and Company performance. Factors, which could significantly change results, include but are not limited to: sales performance, expense levels, competitive activity, interest rates, changes in the Company's financial condition and several business factors. Additional information regarding these and other factors may be included in the Company's quarterly 10-Q and 10K filings and other public documents, copies of which are available from the Company on request. By making these forward-looking statements, the Company undertakes no obligation to update these statements for revisions or changes after the date of this report.

The information in this Form 8-K or the press release reproduced herein shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, nor shall they be deemed incorporated by reference in any filing under the Securities Act of 1933, except as shall be expressly set forth by specific reference in such filing.

Item 9.01. Financial Statements and Exhibits.

### **About ArtRatio**

ArtRatio is a private limited-liability company based in Elche, Spain, with offices also in London and Hong Kong. ArtRatio is dedicated to balancing the display and conservation of art, antiquities and luxury collections. Our name stems from the Golden Ratio, used by artists, architects and scientists, from Euclid to Da Vinci to Dalí, to emulate the divine proportions found in nature. To date, ArtRatio has protected two original maps of the 1815 Battle of Waterloo, an original Torres Spanish guitar from 1888 and rare manuscripts for private collectors and museums across Europe. For more information, please visit our website at [www.artratio.co.uk](http://www.artratio.co.uk), and on [LinkedIn](#), [Twitter](#) and [Facebook](#).

### **About VariGuard SmartGlass**

VariGuard SmartGlass offers the only glazing products with a wide range of visible light transmission, instant switching between dark and clear states, and over 99% UV-blocking at all times. Based on patented SPD light-control technology developed by Research Frontiers, VariGuard panels optimally protect items by limiting their light-exposure to those times people are viewing them. More information about VariGuard products is available on our website at [www.VariGuard.com](http://www.VariGuard.com).

### **About Research Frontiers Inc.**

Research Frontiers is a publicly traded technology company and the developer of patented SPD-Smart light-control film technology which allows users to instantly, precisely and uniformly control the shading of glass or plastic products, either manually or automatically. Research Frontiers has licensed its smart glass technology to over 40 companies that include well known chemical, material science and glass companies. Products using Research Frontiers' smart glass technology are being used in tens of thousands of cars, aircraft, yachts, trains, homes, offices, museums and other buildings. For more information, please visit our website at [www.SmartGlass.com](http://www.SmartGlass.com), and on [Facebook](#), [Twitter](#), [LinkedIn](#) and [YouTube](#).

*Note: From time to time Research Frontiers may issue forward-looking statements which involve risks and uncertainties. This press release contains forward-looking statements. Actual results could differ and are not guaranteed. Any forward-looking statements should be considered accordingly. "SPD-Smart" and "SPD-SmartGlass" are trademarks of Research Frontiers Inc.*
